MiniLMS Stored Procedures
Process & Workflow Reviewer

SQL Server | Based on script6(1).sql | 70 stored procedure definitions

What this reviewer covers

A process-by-process map of stored procedures, their purpose, the main tables they reference, and an all-procedure reference catalog. It explains intended database behavior; it does not prove that each procedure is called by the ASP.NET application.

How to explain any process

Input parameters -> validation and ownership checks -> SELECT / INSERT / UPDATE / DELETE -> returned records or SQL error.

Important design distinction

ECourseStudents is the current course-assignment junction table. EEnrollment separately stores enrollment status and last-accessed lesson data. The latter is not the main assignment table.

Part I. Workflows by process

1. Student registration and account approval

Registration creates a pending student record; an administrator reviews and approves it.

1. EPrograms_GetActive

Retrieves filtered records for the named process.
Inputs: None | SQL: SELECT
Tables referenced: View / other SQL objects; inspect definition

2. EPrograms_Web

Retrieves records for listing.
Inputs: None | SQL: SELECT
Tables referenced: EPrograms

3. EUsers_WebSave

Creates a pending student user after validating email, program and year level.
Inputs: @FirstName, @LastName, @Email, @Password, @ProgramID, @YearLevel | SQL: SELECT, INSERT, THROW
Tables referenced: EUsers, EPrograms

4. EUsers_GetPending

Lists pending approvals or returns their count.
Inputs: @CountOnly | SQL: SELECT
Tables referenced: EUsers, EPrograms

5. EUsers_Approve

Marks the selected account approved and active.
Inputs: @UserID | SQL: UPDATE
Tables referenced: EUsers
Review prompt: What does this process validate before changing or returning data?

2. Account administration and profiles

Administrators view, modify, deactivate or delete user records; students and instructors retrieve or update profile information.

1. EUsers_Web

Retrieves records for listing.
Inputs: None | SQL: SELECT
Tables referenced: EUsers

2. EUsers_WebOne

Retrieves a single matching record.
Inputs: @Email | SQL: SELECT
Tables referenced: EUsers

3. EUsers_ChangeRole

Performs the named database operation.
Inputs: @UserID, @Role | SQL: UPDATE, THROW
Tables referenced: EUsers

4. EUsers_UpdateStudentInfo

Performs the named database operation.
Inputs: @UserID, @ProgramID, @YearLevel | SQL: SELECT, UPDATE, THROW
Tables referenced: EPrograms, EUsers

5. EUsers_WebDelete

Deletes a record, subject to procedure checks.
Inputs: @UserID | SQL: DELETE
Tables referenced: EUsers

6. EUsers_StudentProfileGet

Retrieves profile information.
Inputs: @UserID | SQL: SELECT
Tables referenced: EUsers

7. EUsers_StudentProfilePhotoSave

Updates the user profile photo path.
Inputs: @UserID, @ProfileImageUrl | SQL: UPDATE, THROW
Tables referenced: EUsers

8. EUsers_InstructorProfileGet

Retrieves profile information.
Inputs: @UserID | SQL: SELECT
Tables referenced: EUsers

9. EUsers_InstructorProfilePhotoSave

Updates the user profile photo path.
Inputs: @UserID, @ProfileImageUrl | SQL: UPDATE, THROW
Tables referenced: EUsers

10. EInstructorProfile_WebOne

Retrieves a single matching record.
Inputs: @UserID | SQL: SELECT
Tables referenced: EUsers
Review prompt: What does this process validate before changing or returning data?

3. Academic program management

Manage programs, activate/deactivate them, and populate active program filters.

1. EPrograms_Web

Retrieves records for listing.
Inputs: None | SQL: SELECT

Tables referenced: EPrograms

2. EPrograms_WebSave

Inserts or updates a record.
Inputs: @ProgramID, @ProgramCode, @ProgramName, @IsActive | SQL: INSERT, UPDATE
Tables referenced: EPrograms

3. EPrograms_WebDelete

Deletes a record, subject to procedure checks.
Inputs: @ProgramID | SQL: SELECT, DELETE, THROW
Tables referenced: EUsers, ECourses, EPrograms

4. EPrograms_ActiveFilters

Performs the named database operation.
Inputs: None | SQL: SELECT
Tables referenced: EPrograms

5. EPrograms_GetActive

Retrieves filtered records for the named process.
Inputs: None | SQL: SELECT
Tables referenced: View / other SQL objects; inspect definition
Review prompt: What does this process validate before changing or returning data?

4. Administrator dashboard and course listings

Retrieve aggregate counts, search/list courses, and populate course selectors.

1. EAdmin_GetOverview

Retrieves aggregate dashboard counts.
Inputs: None | SQL: SELECT
Tables referenced: EUsers, ECourses

2. ECourses_GetStatistics

Retrieves aggregate dashboard counts.
Inputs: None | SQL: SELECT
Tables referenced: View / other SQL objects; inspect definition

3. EAdminCourses_GetAll

Retrieves filtered records for the named process.
Inputs: None | SQL: SELECT
Tables referenced: ECourseStudents, ECourses, EPrograms, EUsers

4. ECourses_GetAdminList

Retrieves filtered records for the named process.
Inputs: None | SQL: SELECT
Tables referenced: View / other SQL objects; inspect definition

5. ECourses_Web

Retrieves records for listing.
Inputs: None | SQL: SELECT
Tables referenced: ECourses

6. ECourses_GetByID

Retrieves filtered records for the named process.
Inputs: @CourseID | SQL: SELECT
Tables referenced: View / other SQL objects; inspect definition

7. ECourses_WebOne

Retrieves a single matching record.
Inputs: @CourseID | SQL: SELECT
Tables referenced: ECourses

8. ECourses_GetDropdown

Retrieves concise course options for selectors.

Inputs: None | SQL: SELECT

Tables referenced: View / other SQL objects; inspect definition

9. EAdminCourses_GetDropdown

Retrieves concise course options for selectors.

Inputs: None | SQL: SELECT

Tables referenced: ECourses

Review prompt: What does this process validate before changing or returning data?

5. Course creation, editing, and instructor assignment

Create or edit courses, identify eligible instructors, assign course ownership, and manage course deletion.

1. ECourses_WebSave

Inserts or updates a record.

Inputs: @CourseID, @InstructorID, @CourseTitle, @CourseDescription, @Announcement, @CoursePublished, @ProgramID, @YearLevel, @Semester | SQL: SELECT, INSERT, UPDATE, THROW

Tables referenced: EUsers, EPrograms, ECourses

2. EUsers_GetActiveInstructors

Retrieves filtered records for the named process.

Inputs: None | SQL: SELECT

Tables referenced: View / other SQL objects; inspect definition

3. ECourses_AssignInstructor

Validates instructor eligibility before updating a course instructor.

Inputs: @CourseID, @InstructorID | SQL: SELECT, UPDATE, THROW

Tables referenced: EUsers, ECourses

4. ECourses_WebDelete

Deletes a record, subject to procedure checks.

Inputs: @CourseID | SQL: SELECT, DELETE, THROW

Tables referenced: ECourseStudents, EAssignmentSubmissions, EAssignments, EModules, ECourses

Review prompt: What does this process validate before changing or returning data?

6. Student assignment to courses

List eligible students and courses, create unique assignments, inspect current assignments, and remove assignments subject to checks.

1. EUsers_AssignmentEligibleStudents

Assigns a related record after validation.

Inputs: None | SQL: SELECT

Tables referenced: EUsers, EPrograms

2. ECourses_AssignmentList

Assigns a related record after validation.

Inputs: None | SQL: SELECT

Tables referenced: ECourses, EPrograms

3. ECourses_AssignmentPaged

Lists courses using paging and program filtering.

Inputs: @ProgramCode, @PageNumber, @PageSize | SQL: SELECT

Tables referenced: ECourses, EPrograms

4. ECourseStudents_GetEligible

Lists eligible students for assignment.

Inputs: @CourseID | SQL: SELECT

Tables referenced: View / other SQL objects; inspect definition

5. ECourseStudents_Assign

Creates a student-course assignment after validation and duplicate checking.
Inputs: @CourseID, @StudentID | SQL: SELECT, INSERT, THROW
Tables referenced: ECourses, EUsers, ECourseStudents

6. ECourseStudents_GetAssigned

Lists assigned records.
Inputs: @CourseID | SQL: SELECT
Tables referenced: ECourseStudents, EUsers

7. EAdminCourses_GetAssignedStudents

Assigns a related record after validation.
Inputs: @CourseID | SQL: SELECT
Tables referenced: ECourseStudents, EUsers

8. ECourseStudents_GetByID

Retrieves filtered records for the named process.
Inputs: @ID | SQL: SELECT
Tables referenced: View / other SQL objects; inspect definition

9. ECourseStudents_Remove

Removes an assignment subject to submission/dependency checks.
Inputs: @CourseID, @StudentID | SQL: SELECT, DELETE, THROW
Tables referenced: EAssignmentSubmissions, EAssignments, EModules, ECourseStudents
Review prompt: What does this process validate before changing or returning data?

7. Instructor course and module management

Restrict course/module retrieval to the assigned instructor and add, update, or delete modules.

1. ECourses_GetInstructorCourses

Retrieves filtered records for the named process.
Inputs: @InstructorID | SQL: SELECT
Tables referenced: ECourses

2. EInstructorCourses_Web

Retrieves records for listing.
Inputs: @InstructorID | SQL: SELECT
Tables referenced: ECourses

3. EInstructorCourses_WebOne

Retrieves a single matching record.
Inputs: @CourseID, @InstructorID | SQL: SELECT
Tables referenced: ECourses

4. EInstructorModules_Web

Retrieves records for listing.
Inputs: @CourseID, @InstructorID | SQL: SELECT
Tables referenced: EModules, ECourses

5. EInstructorModules_WebOne

Retrieves a single matching record.
Inputs: @ModuleID, @InstructorID | SQL: SELECT
Tables referenced: EModules, ECourses

6. EInstructorModule_Owns

Checks instructor ownership.
Inputs: @ModuleID, @CourseID, @InstructorID | SQL: SELECT
Tables referenced: EModules, ECourses

7. EModules_WebSave

Inserts or updates a module, depending on ModuleID.
Inputs: @ModuleID, @CourseID, @ModuleTitle, @ModuleOrder | SQL: INSERT, UPDATE
Tables referenced: EModules

8. EModules_WebDelete

Deletes a record, subject to procedure checks.
Inputs: @ModuleID | SQL: SELECT, DELETE, THROW
Tables referenced: EAssignmentSubmissions, EAssignments, EModules
Review prompt: What does this process validate before changing or returning data?

8. Instructor lesson management

Check module/lesson ownership before retrieving or changing lessons.

1. EInstructorLessons_Web

Retrieves records for listing.
Inputs: @ModuleID, @InstructorID | SQL: SELECT
Tables referenced: ELessons, EModules, ECourses

2. EInstructorLessons_WebOne

Retrieves a single matching record.
Inputs: @LessonID, @InstructorID | SQL: SELECT
Tables referenced: ELessons, EModules, ECourses

3. EInstructorLesson_Owns

Checks instructor ownership.
Inputs: @LessonID, @ModuleID, @InstructorID | SQL: SELECT
Tables referenced: ELessons, EModules, ECourses

4. ELesson_Add

Adds a lesson after checking instructor ownership.
Inputs: @InstructorID, @ModuleID, @LessonTitle, @LessonDescription, @LessonOrder, @DurationMinutes | SQL: SELECT, INSERT, THROW
Tables referenced: EModules, ECourses, ELessons

5. ELessons_WebSave

Inserts or updates a record.
Inputs: @LessonID, @ModuleID, @LessonTitle, @LessonDescription, @LessonOrder, @DurationMinutes | SQL: INSERT, UPDATE
Tables referenced: ELessons

6. ELessons_WebDelete

Deletes a record, subject to procedure checks.
Inputs: @LessonID | SQL: DELETE
Tables referenced: ELessons
Review prompt: What does this process validate before changing or returning data?

9. Learning material management

Retrieve, create, or delete material metadata, validating instructor access where implemented.

1. ELessonMaterials_Web

Retrieves records for listing.
Inputs: @LessonID, @InstructorID | SQL: SELECT
Tables referenced: ELessonMaterials, ELessons, EModules, ECourses

2. ELessonMaterials_WebOne

Retrieves a single matching record.
Inputs: @MaterialID, @InstructorID | SQL: SELECT
Tables referenced: ELessonMaterials, ELessons, EModules, ECourses

3. ELessonMaterials_WebSave

Inserts or updates a record.
Inputs: @LessonID, @InstructorID, @FileName, @FilePath, @FileSize | SQL: SELECT, INSERT, THROW
Tables referenced: ELessons, EModules, ECourses, ELessonMaterials

4. ELessonMaterials_WebDelete

Deletes a record, subject to procedure checks.
Inputs: @MaterialID, @InstructorID | SQL: DELETE, THROW
Tables referenced: ELessonMaterials, ELessons, EModules, ECourses
Review prompt: What does this process validate before changing or returning data?

10. Student learning and downloads

Retrieve assigned courses, details, modules, lessons and materials, then verify authorization for a material download.

1. EStudentCourses_GetAssigned

Retrieves assigned courses for an approved active student.
Inputs: @StudentID | SQL: SELECT
Tables referenced: EUsers

2. EStudentCourse_GetDetails

Retrieves course details for an authorized student.
Inputs: @StudentID, @CourseID | SQL: SELECT
Tables referenced: EUsers

3. EStudentCourse_GetModules

Retrieves modules for an authorized student course.
Inputs: @StudentID, @CourseID | SQL: SELECT
Tables referenced: EModules, ECourseStudents, ECourses, EUsers

4. EStudentCourse_GetLessons

Retrieves lessons for an authorized student course.
Inputs: @StudentID, @CourseID | SQL: SELECT
Tables referenced: ELessons, EModules, ECourseStudents, ECourses, EUsers

5. EStudentCourse_GetMaterials

Retrieves materials for an authorized student course.
Inputs: @StudentID, @CourseID | SQL: SELECT
Tables referenced: ELessonMaterials, ELessons, EModules, ECourseStudents, ECourses, EUsers

6. EStudentMaterial_GetDownload

Checks student access and returns material download metadata.
Inputs: @StudentID, @MaterialID | SQL: SELECT
Tables referenced: ELessonMaterials, ELessons, EModules, ECourses, ECourseStudents, EUsers
Review prompt: What does this process validate before changing or returning data?

11. Assignment administration

Create, retrieve, edit and delete assignment definitions.

1. EAssignments_Web

Retrieves records for listing.
Inputs: None | SQL: SELECT
Tables referenced: EAssignments

2. EAssignments_WebOne

Retrieves a single matching record.
Inputs: @AssignmentID | SQL: SELECT
Tables referenced: EAssignments

3. EAssignments_WebSave

Inserts or updates a record.
Inputs: @AssignmentID, @ModuleID, @AssignmentTitle, @AssignmentDescription, @DueDate | SQL: INSERT, UPDATE
Tables referenced: EAssignments

4. EAssignments_WebDelete

Deletes a record, subject to procedure checks.
Inputs: @AssignmentID | SQL: SELECT, DELETE, THROW
Tables referenced: EAssignmentSubmissions, EAssignments
Review prompt: What does this process validate before changing or returning data?

12. Submission and grading

Validate a student submission, store its record, and assign a grade.

1. EAssignmentSubmissions_Submit

Validates and records a student assignment submission.
Inputs: @AssignmentID, @StudentID, @FileUrl | SQL: SELECT, INSERT, THROW
Tables referenced: EAssignments, EModules, ECourses, ECourseStudents, EAssignmentSubmissions

2. EAssignmentSubmissions_Grade

Validates and updates a submission grade.
Inputs: @SubmissionID, @Grade | SQL: UPDATE, THROW
Tables referenced: EAssignmentSubmissions
Review prompt: What does this process validate before changing or returning data?

Part II. Complete 70-procedure index

01. EAdminCourses_GetAll

Process: 4. Administrator dashboard and course listings | Retrieves filtered records for the named process.

02. EAdminCourses_GetAssignedStudents

Process: 6. Student assignment to courses | Assigns a related record after validation.

03. EAdminCourses_GetDropdown

Process: 4. Administrator dashboard and course listings | Retrieves concise course options for selectors.

04. EAdmin_GetOverview

Process: 4. Administrator dashboard and course listings | Retrieves aggregate dashboard counts.

05. EAssignmentSubmissions_Grade

Process: 12. Submission and grading | Validates and updates a submission grade.

06. EAssignmentSubmissions_Submit

Process: 12. Submission and grading | Validates and records a student assignment submission.

07. EAssignments_Web

Process: 11. Assignment administration | Retrieves records for listing.

08. EAssignments_WebDelete

Process: 11. Assignment administration | Deletes a record, subject to procedure checks.

09. EAssignments_WebOne

Process: 11. Assignment administration | Retrieves a single matching record.

10. EAssignments_WebSave

Process: 11. Assignment administration | Inserts or updates a record.

11. ECourseStudents_Assign

Process: 6. Student assignment to courses | Creates a student-course assignment after validation and duplicate checking.

12. ECourseStudents_GetAssigned

Process: 6. Student assignment to courses | Lists assigned records.

13. ECourseStudents_GetByID

Process: 6. Student assignment to courses | Retrieves filtered records for the named process.

14. ECourseStudents_GetEligible

Process: 6. Student assignment to courses | Lists eligible students for assignment.

15. ECourseStudents_Remove

Process: 6. Student assignment to courses | Removes an assignment subject to submission/dependency checks.

16. ECourses_AssignInstructor

Process: 5. Course creation, editing, and instructor assignment | Validates instructor eligibility before updating a course instructor.

17. ECourses_AssignmentList

Process: 6. Student assignment to courses | Assigns a related record after validation.

18. ECourses_AssignmentPaged

Process: 6. Student assignment to courses | Lists courses using paging and program filtering.

19. ECourses_GetAdminList

Process: 4. Administrator dashboard and course listings | Retrieves filtered records for the named process.

20. ECourses_GetByID

Process: 4. Administrator dashboard and course listings | Retrieves filtered records for the named process.

21. ECourses_GetDropdown

Process: 4. Administrator dashboard and course listings | Retrieves concise course options for selectors.

22. ECourses_GetInstructorCourses

Process: 7. Instructor course and module management | Retrieves filtered records for the named process.

23. ECourses_GetStatistics

Process: 4. Administrator dashboard and course listings | Retrieves aggregate dashboard counts.

24. ECourses_Web

Process: 4. Administrator dashboard and course listings | Retrieves records for listing.

25. ECourses_WebDelete

Process: 5. Course creation, editing, and instructor assignment | Deletes a record, subject to procedure checks.

26. ECourses_WebOne

Process: 4. Administrator dashboard and course listings | Retrieves a single matching record.

27. ECourses_WebSave

Process: 5. Course creation, editing, and instructor assignment | Inserts or updates a record.

28. EInstructorCourses_Web

Process: 7. Instructor course and module management | Retrieves records for listing.

29. EInstructorCourses_WebOne

Process: 7. Instructor course and module management | Retrieves a single matching record.

30. EInstructorLesson_Owns

Process: 8. Instructor lesson management | Checks instructor ownership.

31. EInstructorLessons_Web

Process: 8. Instructor lesson management | Retrieves records for listing.

32. EInstructorLessons_WebOne

Process: 8. Instructor lesson management | Retrieves a single matching record.

33. EInstructorModule_Owns

Process: 7. Instructor course and module management | Checks instructor ownership.

34. EInstructorModules_Web

Process: 7. Instructor course and module management | Retrieves records for listing.

35. EInstructorModules_WebOne

Process: 7. Instructor course and module management | Retrieves a single matching record.

36. EInstructorProfile_WebOne

Process: 2. Account administration and profiles | Retrieves a single matching record.

37. ELessonMaterials_Web

Process: 9. Learning material management | Retrieves records for listing.

38. ELessonMaterials_WebDelete

Process: 9. Learning material management | Deletes a record, subject to procedure checks.

39. ELessonMaterials_WebOne

Process: 9. Learning material management | Retrieves a single matching record.

40. ELessonMaterials_WebSave

Process: 9. Learning material management | Inserts or updates a record.

41. ELesson_Add

Process: 8. Instructor lesson management | Adds a lesson after checking instructor ownership.

42. ELessons_WebDelete

Process: 8. Instructor lesson management | Deletes a record, subject to procedure checks.

43. ELessons_WebSave

Process: 8. Instructor lesson management | Inserts or updates a record.

44. EModules_WebDelete

Process: 7. Instructor course and module management | Deletes a record, subject to procedure checks.

45. EModules_WebSave

Process: 7. Instructor course and module management | Inserts or updates a module, depending on ModuleID.

46. EPrograms_ActiveFilters

Process: 3. Academic program management | Performs the named database operation.

47. EPrograms_GetActive

Process: 3. Academic program management | Retrieves filtered records for the named process.

48. EPrograms_Web

Process: 3. Academic program management | Retrieves records for listing.

49. EPrograms_WebDelete

Process: 3. Academic program management | Deletes a record, subject to procedure checks.

50. EPrograms_WebSave

Process: 3. Academic program management | Inserts or updates a record.

51. EStudentCourse_GetDetails

Process: 10. Student learning and downloads | Retrieves course details for an authorized student.

52. EStudentCourse_GetLessons

Process: 10. Student learning and downloads | Retrieves lessons for an authorized student course.

53. EStudentCourse_GetMaterials

Process: 10. Student learning and downloads | Retrieves materials for an authorized student course.

54. EStudentCourse_GetModules

Process: 10. Student learning and downloads | Retrieves modules for an authorized student course.

55. EStudentCourses_GetAssigned

Process: 10. Student learning and downloads | Retrieves assigned courses for an approved active student.

56. EStudentMaterial_GetDownload

Process: 10. Student learning and downloads | Checks student access and returns material download metadata.

57. EUsers_Approve

Process: 1. Student registration and account approval | Marks the selected account approved and active.

58. EUsers_AssignmentEligibleStudents

Process: 6. Student assignment to courses | Assigns a related record after validation.

59. EUsers_ChangeRole

Process: 2. Account administration and profiles | Performs the named database operation.

60. EUsers_GetActiveInstructors

Process: 5. Course creation, editing, and instructor assignment | Retrieves filtered records for the named process.

61. EUsers_GetPending

Process: 1. Student registration and account approval | Lists pending approvals or returns their count.

62. EUsers_InstructorProfileGet

Process: 2. Account administration and profiles | Retrieves profile information.

63. EUsers_InstructorProfilePhotoSave

Process: 2. Account administration and profiles | Updates the user profile photo path.

64. EUsers_StudentProfileGet

Process: 2. Account administration and profiles | Retrieves profile information.

65. EUsers_StudentProfilePhotoSave

Process: 2. Account administration and profiles | Updates the user profile photo path.

66. EUsers_UpdateStudentInfo

Process: 2. Account administration and profiles | Performs the named database operation.

67. EUsers_Web

Process: 2. Account administration and profiles | Retrieves records for listing.

68. EUsers_WebDelete

Process: 2. Account administration and profiles | Deletes a record, subject to procedure checks.

69. EUsers_WebOne

Process: 2. Account administration and profiles | Retrieves a single matching record.

70. EUsers_WebSave

Process: 1. Student registration and account approval | Creates a pending student user after validating email, program and year level.

Part III. Key questions for technical review

Why are ECourseStudents and EEnrollment separate?

The former stores course assignments; the latter stores status/progress information. Confirm whether enrollment tracking is needed before removing it.

Why check instructor ownership?

A valid CourseID or ModuleID alone does not prove that the requesting instructor owns it.

Why use NOT EXISTS in assignment procedures?

To avoid inserting a duplicate student-course pair; a UNIQUE constraint should also protect the data.

Why use JOINs in student material retrieval?

The material-to-lesson-to-module-to-course chain identifies which course the material belongs to, enabling assignment-based access checks.

Can all 70 procedures be called by the current website?

Not necessarily. Confirm usage by searching C# SqlCommand calls and other execution paths before labeling a procedure unused.

Can the reviewer be used as an execution trace?

No. Process order is a logical map; actual runtime calls must be checked in backend code or SQL tracing.
